DETAILED ACTION

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Attorney Lawrence R Goerke (Reg. No. 45,927) on June 13, 2005.

The application has been amended as follows:

Claim 1: A method of sending an electronic message comprising:

- a) examining syntactic content of said electronic message;
- b) comparing said syntactic content to a keyword database for a syntactic match between said syntactic content and one or more keywords stored in said keyword database;
- c) examining an addressed destination of said message to determine an identity of an intended addressee;
- d) comparing said identity of said intended addressee to an addressee database for an address-based match between said identity and one or more addressees stored in said addressee database;
- e) provided that said message does not have an attachment, alerting a sender of said message that said electronic message does not have an attachment, based on one or more of said syntactic match and said address-based match; and

f) automatically updating one or more of said first keyword database, based on said syntactic match, and said addressee database, based on said address-based match wherein, provided that said attachment is attached to said message, a frequency of one or more of a keyword correlation their respective said keyword and an address-based correlations to each respective database is increased by one and wherein, provided that said attachment is not attached to said message, a frequency of their respective one or more of said keyword correlation and said address-based correlations is decreased by one.

Authorization for this examiner's amendment was given in a telephone interview with Attorney Lawrence R Goerke (Reg. No. 45,927) on June 10, 2005.

The application has been amended as follows:

Claim 14: A method of sending an electronic message comprising:

a) examining:

content of said electronic message for one or more selected keywords therein, said selected keywords being of a keyword database of keywords associated with messages that frequently have attachments sent therewith; and

an addressed destination of said message for an identity of an intended addressee that

matches an addressee identity listed in an addressee database of addressee identities associated

with messages that frequently have attachments sent therewith;

b) provided said electronic message does not already have an attachment associated therewith, alerting a user that said electronic message does not have an attachment associated therewith provided:

one <u>or more</u> of said selected keyword is located within said electronic message; <u>and</u>

<u>said addressed destination matches an addressee identity listed in said addressee</u>

database;

c) upon said b), provided that said user sends said electronic message without an attachment, updating said keyword database wherein a correlation of sending electronic messages having said one or more keywords with attachments is decreased by one;

d) upon said b), provided that said user attaches an attachment, <u>correspondingly</u> updating:
said keyword database wherein a correlation of sending electronic messages having said
one or more keywords with attachments is increased by one; and

said addressee database wherein a correlation of sending electronic messages having said addressee identity with attachments is increased by one;

e) provided that said electronic message does have an attachment associated therewith, correspondingly updating:

said keyword database wherein a correlation of sending electronic messages having said one or more keywords with attachments is increased by one; and

said addressee database wherein a correlation of sending electronic messages having said addressee identity with attachments is increased by one.
